

→ **Turn on the
brightest light of all
-SUNLIGHT**

Let's draw the curtains
and let natural light
stream in.

Did you know that a
single room
**consumes 2.4 units of
electricity per hour?**

Let's do our bit for
nature by using as
much natural light as
possible.

On February 14th, 2011
Brigade Hospitality
embarked on a romantic
journey with Nature.

Brigade Hospitality is
celebrating not only the
day but also the year
ahead by dedicating one
eco-friendly initiative a
month to Mother Nature.

In August we are
conserving electricity
by switching on the
brightest light of all
- Sunlight!
